FSC Certification for our German production sites

On November 26th and 27th 2009, Papierfabrik Palm's production sites in Aalen-Neukochen, Eltmann and Woerth were certified according to the FSC (Forest Stewardship Council) guidelines.

The FSC-product chain describes an information flow, which tracks the product from the forest, or in the case of recycled paper, from the collection point, all the way to the consumer. FSC's goal is to make a contribution to promote responsible forest management. FSC develops, supports and encourages international, national and regional standards.

Palm's two main paper grades, Recycled Newsprint and Recycled Corrugated Papers were both successfully certified according to FSC standards. The documentation of raw material input underlined a minimum usage of 85% post consumer waste for both categories.

Palm Paper's working documents such as order confirmation, invoice and delivery note will carry the FSC certification logo. This will also allow Papierfabrik Palm's customers to declare all paper purchased from Palm as FSC certified in their own FSC documentation.
