Progress on PM 7

Construction for the new PM7 newsprint machine is progressing at a rapid pace. Large reinforced concrete sections are delivered to the Saddlebow site on a daily basis before being lifted into place by giant cranes. The structure is scheduled to be completed by the end of this year ready for the installation of the new paper machine at the beginning of 2009.

The official topping out ceremony will be celebrated on December 11th 2008.
