December 2008

Lynn PM7 Topping Out Ceremony – 11th December 2008

On Thursday 11th December Palm Paper were joined by customers and further business partners and by over 400 construction workers to celebrate the "Topping Out" ceremony, a milestone in the progress of the £400 million project.

Now that large sections of the roof have been installed the installation of the worlds largest newsprint machine is set to commence in early 2009. During his speech Dr. Palm confirmed the mill was slightly ahead of schedule and would start production in September.

West Norfolk council leader Nick Daubney thanked Dr. Palm for choosing King's Lynn as the site for the new mill, Palm's first major outside Germany.

When running at full capacity the mill will produce 400,000 tonnes per annum of high quality newsprint from 100% recycled fibre.
