### **Press release**

February 26, 2010

### **PALM TWIN**

Papierfabrik Palm are pleased to announce a new product, Palm Twin, which combines the high quality properties of both our Testliner 3 and Fluting grades.

Palm Twin, with its excellent strength values and superior runability, provides corrugators with total flexibility as it can be used to meet the demands made of both waste based Fluting and Testliner 3.

This flexibility is not only advantageous when sorting paper for production, but also optimises logistics and in turn this leads to a significant reduction in the number of storage slots and stock levels required at the corrugating plant.

Palm Twin is available in the grammage range 90 – 110 g/m<sup>2</sup>.

Palm Fluting is still available in the grammages 80 – 180 g/m<sup>2</sup> and Testliner 3 in the grammages 90 – 200 g/m<sup>2</sup>. Please visit our website [www.papierfabrik-palm.de](http://www.papierfabrik-palm.de) to view the entire Palm product range.
